

Connecting your Windows 10 Device to a Wireless Network

<p>1. Locate the globe icon at the bottom right of your device.</p>	 A screenshot of the Windows 10 taskbar. The network icon, which is a globe, is circled in yellow. A yellow line points from the circle to the taskbar. The taskbar also shows other icons like volume and battery, and the time/date is 7:03 PM 6/8/2021.
<p>2. Click on the globe icon, a list of available Wi-Fi networks.</p>	 A screenshot of the Windows 10 network settings window. It shows a list of available Wi-Fi networks, including 'BhavIMACT Secured', 'Our_Home Secured', 'Amit Secured', 'EXCITEL0331 Secured', 'Excel Secured', 'EXCITEL 269 Secured', and 'Excel Broadband Secured'. The 'Wi-Fi' toggle is turned on. The taskbar at the bottom shows the time as 9:30 PM on 10-01-2021.
<p>3. Select the network ALAMO_Guest to connect</p>	 A close-up screenshot of the Windows 10 network settings window. It shows two networks: 'ALAMONet' and 'ALAMO_Guest'. The 'ALAMO_Guest' network is highlighted, indicating it is the selected network to connect to.

4. Select Connect.

5. Once you are connected to the ALAMO_Guest, a pop up screen will prompt you to enter your email address.
